

Since 2002 **AXESS** is a marketing company involved in sales and service of plastic joining products like ultrasonic plastic welding, spin welding, tube sealing machines etc.

AXESS is a team of technically experienced, aggressive, enthusiastic and ambitious peoples, who focused on success and have techno commercial tie-up with world well known company PI Shan Automatic Co. Ltd., TAIWAN as well as their authorized agent of for marketing their products in India since 2002. .

Axess has developed and manufacturing same quality machines in India with **AXESS** brand name by the help of Bensonic & being experienced in ultrasonic technology from a long time span of about 18 years. All components for Indian make machine sources from the similar supplier from Taiwan and Germany, Some Key components still supplied by **BENSONIC**.

GEYSER HOUSING WELDING MACHINE

This machine is specially developed by Axess for geyser manufacturer. By this machine all type of geyser housing ABS sheet can be weld no matter what is the height and dia of the geyser.

Silent Features

- * Different-different program can be store in its HMI for different size model. By one press program can be change.
- * Machine is powered by powerful servo motor controlled buy TFT - HMI control for smooth movement.
- * Tried and trusted reliable 2800w, 15 KHz ultrasonic system does the perfect duty of welding.

Technical Specification of AW1528-GH

Dimension L x W x H	1480mm x 760mm x 1820mm
Weight	550 Kg (Approx)
Input Voltage & Power	220V, 4 KW
Ultrasonic Power	2800W 15 KHz
Max Geyser Height	up to 800mm
Max Geyser Dia	up to 600mm
Controls	PLC & Colored HMI 5"
Air pressure req.	up to 6 Kg/cm square
Productivity	8-15 operation/ minute
Auto/Manual	Both operation
